Hazardous Weather

Moisture from Hurricane Linda will stream northward but remain west of New Mexico. However the same ole tropical moisture we've seen all summer continues over the Borderland. This moisture is adequate enough to fuel scattered showers and thunderstorms this afternoon. High temperatures will remain above normal as the lowlands experience yet another 90 degree day.

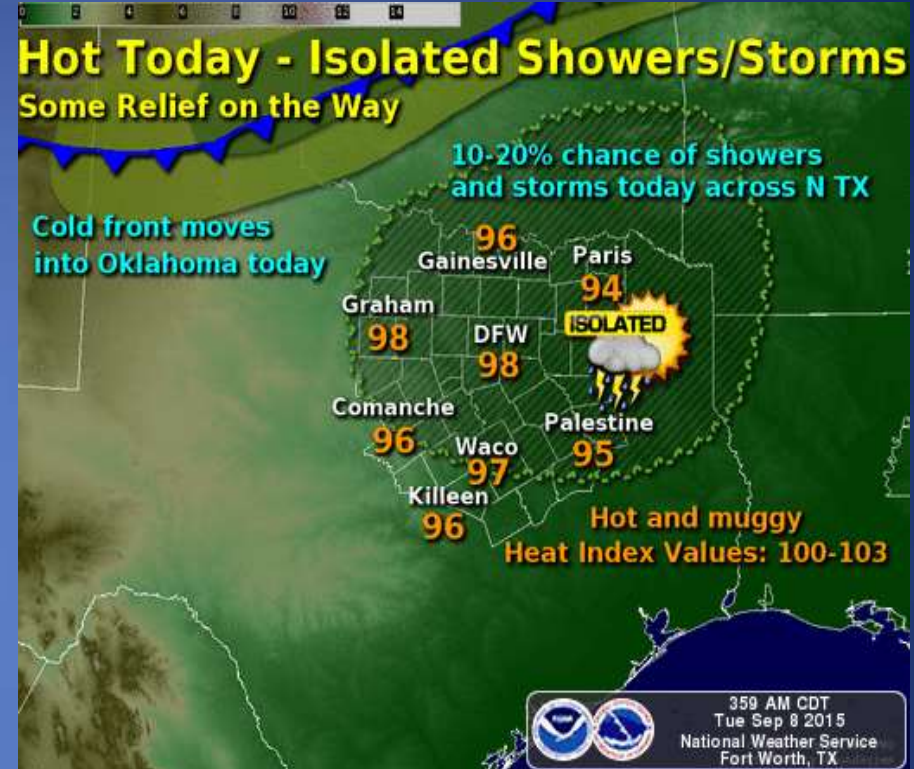

With a return to work after the Labor Day weekend comes a bit of weather for West Texas residents. Scattered thunderstorms are expected to develop this afternoon and possibly congeal into a line which is expected to drift southeastward tonight. Much of the activity will be near a cold front and a few lucky locations may see an inch or two of precipitation. Best rain chances look to be east of the I-27 corridor.

Hazardous Weather

Isolated to scattered showers and thunderstorms will be possible today across South Texas, but should diminish with the loss of daytime heating this evening. Another very warm day is expected with highs near 101 degrees around Laredo to lower and middle 90s over the Coastal Plains and Victoria Crossroads.

Another hot day is in store for North Texas with high in the mid to upper 90s and heat index values between 100 and 103 degrees. There is a 10-20% chance of thunderstorms this afternoon across the region but better rain and storm chances arrive later tonight as a cold front moves into the area.
